Head HR Apple Academy
Nongsa Digital park, Nongsa
Batam
August 25 - 2019

My name is River a junior programmer. I would like to express my interest in applying for the Apple Academy at Nongsa Digital park. I've always want to becoming a professional developer and developing my application so people can use it, That's why i believe that a academy from Apple academy would help me improve my innovation, creativity, and passion within me.

After the seminar at Ruang Kreasi that explain about the Apple Academy purpose, i believe that Apple Academy is the best place for me to learn, to develop my skill, innovation, creativity, passion, and to interact with the other people so i can gain each other mind set and to gain social network so it can help me to know many information that i want. Joining the Apple Academy is an opportunity for me and i really love to learn many thing and grow in the Apple Academy. I want to know how far i can grow by joining the academy. Considering my experience and knowledge is still limited but my desire to enrich mine experience and knowledge. I am trust my limited skill and desire are enough. If i been accept by the academy i feel i can combine it with my experience that i have learn from my experience.

The first time i learning programming is with impact byte at Ruang Kreasi. I am being taught by their mentor, and i learn how to make program from zero is very hard but i still manage to complete the session even thought is very for me after all the lesson is done i am always how to make a program from morning to evening it was fun journey. I am now working in PT. Intek Karya work as programmer. The work was very hard even now but i still can do the task they give. What i aim in the near future is to be full-stack developer so i can make more innovation and improve it.

I hope to be given a chance, as i am trying hard to show that i am capable to exceeding your expectation

Thank you for the time and considering my motivation letter.

Sincerely,

River
